

Scope 3 Innovation Forum
A strategy for climate competitiveness
16th-17th June, Amsterdam

Confirmed speakers:

1. Nicolas Clerget, global director net zero strategy, **Heineken**
2. Andres Casallas, sustainable finance specialist, **WBCSD**
3. Lene Petersen, senior manager climate and business, **WWF Switzerland**
4. Ulla Hueppe, VP sustainability, **Henkel**
5. Eugenia Ceballos Hunziker, group head sustainable procurement, **Holcim**
6. Nancy Gillis, conference co-chair and lead strategy and innovation at **Scope 3 Peer Group**
7. Atnyel Guedj, chief product officer (CPO), **Made2flow**
8. Kate Yauk, global director of sustainability, **KraftHeinz**
9. Mie Prehn Nygaard, head of decarbonisation, **Orsted**
10. Lena Armas, director of climate change, **Decathlon**
11. René Groot Bruinderink, managing director carbon management, **FincoEnergies**
12. Kim Schoppink, Europe regional lead, **Science Based Targets initiative**
13. Preeti Srivastav, group head of sustainability, **Asahi Group Holdings**
14. Valeria Forlin, Unit for land economy and carbon removals, **European Commission**
15. Alice Steenland, chief strategy, sustainability & marketing officer, **Signify**
16. Gregor Frowein, sustainability & innovation lead, **Asahi**
17. Judy Pattiasina, product manager GoodShipping, **FincoEnergies**
18. Nicki de Silva, sustainable products & brands director, **Reckitt**
19. Andreas Runge, Scope 3 lead, **Gore Fabrics**
20. Sonya Bhonsle, director of global corporates, **CDP**
21. Luc Beerens, global sustainable sourcing director, **Royal Canin**
22. Arjun Arya, Manager: environmental sustainability ops sustainability, **PMI**
23. Gabriela Tschanz, sustainability director, **PepsiCo**
24. Daniel Galis, Europe director, **Renewable Thermal Collaborative**
25. Guillaume Audy, corporate communications and sustainability director, **Iberchem SAU**
26. Cecilia Nodet, climate specialist - programme lead scope 3 & net Zero, **Suntory Beverage & Food Europe**
27. Jeroen Gerlag, director climate group europe / food system lead, **Climate Group**
28. Gad Pettersson, head of product quality & sustainable supply chain, **Systembolaget**
29. Janique Koopman, global supply chain sustainability manager - Scope 3, **Arla Foods**
30. Franco Costantini, managing director, **Regenagri**
31. Carlo Wessel, sustainability manager - environment and producer services, **NKG**
32. Sahil Aggarwal, GHG accounting lead, **Siemens Healthineers**
33. Andres Casallas, sustainable finance specialist, **WBCSD**
34. Livia Paraguassú, global climate & sourcing manager, **Nestlé**
35. Michal Zrust, CEO and founder, **Lestari Capital**
36. Dr. Ivana Krkljus, strategic senior manager, green transformation and market-pull instruments, **BASF**

For more information or to get involved, please get in touch with Natasha Bodnar at

natasha.bodnar@innovationforum.co.uk

- 37. Ignacio Hernandez-Bonnett, global policy manager for chemicals and manufacturing, **Shell**
- 38. Harry Vine, sustainability manager – manufacturing and chemistry, **Marks & Spencer**
- 39. Anupam Shahi, global head of sustainable trade product global trade solutions, **HSBC**
- 40. Leire Elhazaz Aguado, **Fashion Pact**
- 41. Megan Mitrevski Dale, director, environmental sustainability, **CCEP**
- 42. Jonathan Salmon, head of sustainability, **Li & Fung**
- 43. Madeline Ojakovoh, manager, climate adaptation, **WBCSD**
- 44. Dr. Arthur Krebbers, managing director, sustainable finance advisory, **NatWest**
- 45. Jorrit Vervoordeldonk, sustainability program manager, **Picnic Technologies**
- 46. Vicky Sins, head of programme – planet, **World Benchmarking Alliance**
- 47. Eduardo Gomez, head of product, supply chain decarbonization, **Green Project Technologies**
- 48. Alexander Löhner, chief corporate responsibility officer, **Brose**
- 49. Hans Royal, senior director, renewable energy and carbon advisory, **SE Advisory Services**
- 50. Jesus Aisa, climate change director, **Adidas**
- 51. Barbara Sophia Kölbl, sustainability economist – RaboResearch, **Rabobank**
- 52. Trevor Shah, head of sustainability and science Garnier, **L'Oréal Group**
- 53. Clara Rehder, manager industrial decarbonization, **EnbW**
- 54. Aline Casagrande, global climate director, **AB InBev**
- 55. Tove Heijne, sustainable investment controller, **H&M**
- 56. Hannah Hislop, head of sustainability – climate, **Unilever**
- 57. Julie Nash, director of ecosystem services, **Winrock International**

Day 1 Tuesday 16th June

8.00–9.00 **Pre-conference Workshop: Demystifying SBTi 2.0: Practical implementation lessons from early adopters**

Nicolas Clerget, global director net zero strategy, **Heineken**
 Andres Casallas, sustainable finance specialist, **WBCSD**
 Lene Petersen, senior manager climate and business, **WWF Switzerland**

9.00–9.05 **Co-chairs opening remarks**

9.05–9.40 **Reality check: Is Scope 3 ambition translating to real world progress?**

Five years into the 'decade of decarbonisation', many companies have made real progress toward their climate commitments. But with low hanging fruit gone, the major challenge of Scope 3 remains. And despite ambitious commitments, measurable progress remains slow and uneven.

This opening plenary will take stock of where we stand, what's working, and where momentum is stalling. We will ask our panel to discuss:

- Where have we made the most progress and why?
- What are the biggest bottlenecks? From data and finance to supplier engagement
- Some say the recent Middle East conflict and resulting energy crisis is a massive, unanticipated stimulus. Is that the case and why?
- Much of global scientific data came from the US, where those data sources are being shut down. Where are you looking for trusted data?

For more information or to get involved, please get in touch with Natasha Bodnar at natasha.bodnar@innovationforum.co.uk

Ulla Hueppe, VP sustainability, **Henkel**

Eugenia Ceballos Hunziker, group head sustainable procurement, **Holcim**

Moderated by Nancy Gillis, conference co-chair and lead strategy and innovation at **Scope 3 Peer Group**

9.40-10.30 **A strategy for climate competitiveness: Reframing Scope 3 as a driver of risk mitigation, resilience and supply security**

Decarbonisation is not a moral or an ethical issue for business. It is essential for competitiveness. Climate adaptation and supply chain resilience are key to business continuity and long-term success.

This discussion will look at how forward-looking companies consider climate action as core to business strategy. We'll assess:

- How Scope 3 strategies can reduce volatility, improve supply chain security and deliver a tangible ROI
- The financial and operational advantages of embedding climate resilience into procurement
- How to demonstrate the business value in long-term investment into supplier decarbonisation
- Practical steps to integrate Scope 3 targets into enterprise risk management

Atnyel Guedj, chief product officer (CPO), **Made2flow**

Kate Yauk, global director of sustainability, **KraftHeinz**

Mie Prehn Nygaard, head of decarbonisation, **Orsted**

Lena Armas, director of climate change, **Decathlon**

Moderated by: Tanya Richard, COO and head of stakeholder engagement, **Innovation Forum**

10.30-11.10 Networking break

11.10-11.55 **Science Based Targets 2.0: How standards revision will incentivise investment and action in the short term**

The second consultation draft of SBTi's Corporate Net-Zero Standard V2.0 brings a step-change in how companies are expected to plan, act and disclose on net-zero. The revisions introduce new frameworks for responsibility over ongoing emissions, strengthened transition planning, and higher integrity requirements – with clear implications for value-chain decarbonisation and supply-chain investment.

- How will the new SBTi framework reshape corporate climate targets and accountability?
- What "taking responsibility for ongoing emissions" really means in practice
- How companies can integrate transition planning, financing and supplier engagement under new rules
- Will tougher assurance and transparency requirements drive more credible – or more cautious – commitments?
- Can mechanisms such as book & claim, shared impact models and value-chain finance unlock collective decarbonisation – or do they risk diluting accountability?

René Groot Bruinderink, managing director carbon management, **FincoEnergies**

Kim Schoppink, Europe regional lead, **Science Based Targets initiative**

Preeti Srivastav, group head of sustainability, **Asahi Group Holdings**

Moderated by Tanya Richard, COO and head of stakeholder engagement, **Innovation Forum**

For more information or to get involved, please get in touch with Natasha Bodnar at natasha.bodnar@innovationforum.co.uk

11.55-12.30 **Policy and climate investment: How companies can leverage public funding to accelerate supply chain decarbonisation**

Governments are increasingly shifting from setting climate targets to deploying large-scale industrial policy and investment to accelerate the transition. For companies working to reduce Scope 3 emissions, these initiatives create new opportunities to unlock capital, de-risk projects and bring emerging low-carbon technologies to market.

This session will explore how businesses can work with governments to mobilise public funding and support innovation across value chains.

- How can companies leverage public funding and industrial policy to accelerate decarbonisation across supply chains?
- What lessons can be learned from the Inflation Reduction Act in mobilising private investment and scaling clean technologies?
- How are governments supporting innovation, infrastructure and early-stage technologies critical for Scope 3 reductions?
- How can industrial policy help bridge the gap between innovation and commercialisation for the technologies needed to decarbonise supply chains

Valeria Forlin, unit for land economy and carbon removals, **European Commission**

Alice Steenland, chief strategy, sustainability & marketing officer, **Signify**

Moderated by Nancy Gillis, conference co-chair and lead strategy and innovation at **Scope 3 Peer Group**

12.30-1.30 Lunch

1.30-5.00 Breakout sessions

| Energy transition UvA 2 | Supply chain engagement UvA 3 | Technology, data & processes UvA 4 |
|--|--|---|
| <p>Power purchase agreements: How brands can partner to deliver renewable capacity at scale through supply chains</p> <p>Gregor Frowein, sustainability & innovation lead, Asahi</p> <p>Hans Royal, senior director, renewable energy and carbon advisory, SE Advisory Services</p> <p>Moderated by: Nicola Cullen, senior manager, energy, Climate Group</p> | <p>A practical guide to insetting: Strategy, implementation, measurement and reporting</p> <p>Judy Pattiasina, product manager GoodShipping, FincoEnergies</p> <p>Moderated by: Nancy Gillis, conference co-chair and lead strategy and innovation, Scope 3 Peer Group</p> | <p>From reporting to results: Turning Scope 3 data into action</p> <p>Nicki de Silva, sustainable products & brands director, Reckitt</p> <p>Andreas Runge, Scope 3 lead, Gore Fabrics</p> <p>Sonya Bhonsle, director of global corporates, CDP</p> <p>Moderated by: Chris Pocock, consultant, Rooted</p> |

Day 2 Wednesday 17th June

9.00-9.50 **Climate resilient supply: How are leading companies integrating adaptation into their climate transition planning**

Climate impacts now disrupt supply chains even more frequently than geopolitical or financial shocks. Adaptation is critical to ensuring business continuity and social stability.

Our panel will discuss:

- How are businesses mapping physical climate risks and integrating resilience into supplier management?
- How can companies prioritise adaptation investments within broader transition plans?
- What does the intersection between adaptation, human rights, and long-term value protection look like in practice?
- What does “climate resilient supply” really mean for global companies today? Is it possible to attribute an ROI?

Megan Mitrevski Dale, director, environmental sustainability, **CCEP**

Jonathan Salmon, head of sustainability, **Li & Fung**

Luc Beerens, global sustainable sourcing director, **Royal Canin**

Moderated by: Madeline Ojakovoh, manager, climate adaptation, **WBCSD**

9.45-10.05 **Fireside chat with L'Oréal: Aligning sustainability and finance to drive real decisions**

This conversation explores why working in lockstep with finance is critical, and how a deeper understanding of cost, margin, and value is reshaping climate strategy.

Trevor Shah, head of sustainability and science Garnier, **L'Oréal Group**

Moderated by: Tanya Richard, COO and head of stakeholder engagement, **Innovation Forum**

10.05-10.25 **What will actually get funded? Investor expectations for Scope 3 decarbonisation**

In this fireside chat, NatWest shares insights from its latest research into transition finance, exploring how investor expectations are evolving and what this means for companies. From credible transition plans and CapEx alignment to governance and real-world progress, the discussion will unpack what it takes to secure investment – and why ambition alone is no longer enough.

Dr. Arthur Krebbers, managing director, sustainable finance advisory, **NatWest Commercial & Institutional**

Moderated by: Vicky Sins, head of programme – planet, **World Benchmarking Alliance**

For more information or to get involved, please get in touch with Natasha Bodnar at natasha.bodnar@innovationforum.co.uk

10.25-11.00 Networking break

11.00-11.15 Scope 3 measurement presentation: Using macroeconomic data to estimate value chain emissions

Building on newly developed approaches now being adopted in industry models and impact reporting, Rabobank will share how this methodology can help organisations close data gaps and generate more decision-useful insights across complex value chains.

Barbara Sophia Kölbl, sustainability economist – RaboResearch, **Rabobank**

11.15-12.00 Product carbon footprint: How to navigate the barriers to entry and create a compelling market for supplier decarbonization

Product carbon footprinting is increasingly seen as a critical tool for driving Scope 3 action – but inconsistent methodologies, high data burdens, and limited supplier incentives continue to slow progress. While PCFs promise greater transparency and comparability, many companies struggle to move from pilots to scalable, decision-useful implementation.

This session will explore how leading companies are approaching product-level emissions in practice, and what needs to change to unlock value for both buyers and suppliers. The discussion will examine:

- Where product carbon footprinting adds the most strategic value – and where it risks becoming an administrative burden
- How to balance methodological rigour with practicality and supplier capability
- What role PCFs can play in procurement decisions, supplier incentives, and low-carbon product design

Eduardo Gomez, head of product, supply chain decarbonization, **Green Project Technologies**

Alexander Löhner, chief corporate responsibility officer, **Brose**

Jesus Aisa, climate change director, **adidas**

Nancy Gillis, conference co-chair and lead strategy and innovation at **Scope 3 Peer Group**

12.00-1.00 Lunch

1.00-2.30 **Roundtables** – These facilitated roundtables are designed for **peer-to-peer exchange**, giving participants space to test ideas, share challenges, and explore solutions in an off-the-record setting.

Roundtable A: **Engaging suppliers for Scope 3 decarbonization: how can climate contracts and low-carbon sourcing work in practice?**

Roundtable B: **Decarbonisation as opportunity: How can emerging markets leapfrog to low-carbon growth?**

Roundtable C: **From strategy to action: How do you embed Scope 3 across the business?**

- Aline Casagrande, global climate director, **AB InBev**

Roundtable D: **Barriers to 2030: What's going to prevent business from reaching short term targets?**

- Vicky Sins, head of programme – planet, **World Benchmarking Alliance**

Roundtable E: **Supply chain heat decarbonisation: How to unlock low-carbon thermal energy in global supply chains**

For more information or to get involved, please get in touch with Natasha Bodnar at natasha.bodnar@innovationforum.co.uk

- Daniel Galis, Europe director, **Renewable Thermal Collaborative**

Roundtable F: **AI for scope 3: The opportunities, limitations and real-world applications of AI and advanced tech**

- Jorrit Vervoordeldonk, sustainability program manager, **Picnic Technologies**

2.30-2.45 Wrap-up and closing remarks

For more information or to get involved, please get in touch with Natasha Bodnar at natasha.bodnar@innovationforum.co.uk
